VIDAYU FOUNDATION

Memorandum of Association - Objectives Summary

This plain-language summary is prepared from the approved e-MOA of VIDAYU FOUNDATION for public transparency. It does not replace the registered Memorandum of Association filed with the Ministry of Corporate Affairs.

Legal status	Section 8 company limited by shares
CIN	U72100BR2026NPL089247
Incorporated	3 November 2026
Registered State	Bihar
Objects extend to	Whole of India

1. Health and Medical Research

Undertake, promote, support and collaborate in medical, biomedical, clinical, epidemiological, public-health, health-systems, translational, implementation, behavioural and community-based research; conduct surveys, registries, observational and clinical studies; and develop evidence-based healthcare solutions.

2. Research Grants and Institutional Collaboration

Seek, receive, administer and utilise research grants and technical support from ICMR, CSIR, DHR, DBT, DST, Central and State Governments, universities, hospitals, research institutions, foundations and other lawful organisations for the objects of the Company.

3. Primary, Community and Rural Health

Establish, operate, maintain, support or assist research centres, laboratories, training centres, clinics, healthcare and community-health facilities; strengthen primary healthcare, family medicine, continuity of care, referrals and outreach, particularly for rural, remote, underserved and vulnerable communities.

4. Prevention, Screening and Public Health

Organise health and diagnostic camps, screening, vaccination and immunisation programmes, preventive-health initiatives and community outreach; and undertake education and prevention related to communicable and non-communicable diseases, maternal and child health, women's health and geriatric health.

5. Affordable Access and Assistance

Provide or facilitate healthcare, medicines, investigations, treatment assistance, nutrition, rehabilitation and palliative care for poor, needy and disadvantaged persons; and support affordable access to medicines, vaccines, diagnostics, medical devices and essential healthcare products, subject to applicable law.

6. Education, Training and Capacity Building

Promote medical, healthcare, public-health and scientific education through conferences, seminars, workshops, webinars, continuing professional education, research-methodology programmes, online/offline courses, skill development, mentorship and academic support.

7. Digital Health and Knowledge Dissemination

Develop, promote, evaluate and support digital health, telehealth, telemedicine, healthcare software, clinical decision support, AI, data systems, screening and risk-assessment tools, patient-support systems and web/mobile applications for public benefit; publish scientific and health-education materials.

8. Partnerships, Humanitarian Action and Wider Public Benefit

Collaborate with governments, universities, medical colleges, hospitals, research institutions, professional organisations, Section 8 companies, trusts, societies and other lawful entities; support humanitarian health action during emergencies and promote sanitation, safe water, environmental and occupational health and social determinants of health.

Supporting Powers and Safeguards

The Company may receive grants, donations and CSR contributions; engage qualified professionals; constitute research and ethics committees; maintain research databases and knowledge assets; and obtain licences, ethics approvals and accreditations required for regulated work. The e-MOA states that the Company shall not undertake independent commercial, money-lending, investment or other financial business, and that income or surplus is to be applied solely towards its objects.

Section 8 Safeguard

Profits, income and property are to be applied solely toward the Company's objects, and no portion is to be distributed to members by way of dividend, bonus or profit.
